encl. 460, 32 p. 2500 (v. 2)
71.00p

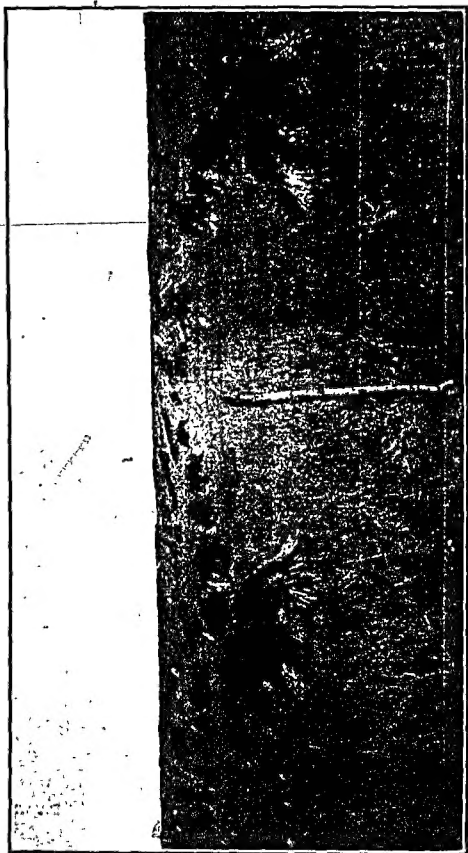

THE THE SETTLERS of the Donalda district, have formed ourselves into a club, and are issuing this booklet that we may by its distribution, and by personal correspondence, build up a more closely settled community, thereby benefitting our families and ourselves. Because we have

passed the experimental stage in the development of our farms, we are able to say to our friends, without hesitation and with absolute knowledge, that those who read this, (our truthful and unexaggerated description of conditions) and are persuaded to undertake the development of the unimproved lands adjoining us will have started on the sure road to happiness and independence, already attained by so many in our district, which affords the settler opportunities for as rich rewards as any to be found in the great west.

The majority of these unimproved lands are owned by the Canadian Pacific Railway Company. It is true that this and other Companies own large areas of land, in different portions of Alberta which are open to settlement. Our friends, however, have the opportunity to benefit largely from the great amount of time and money spent and the trouble taken by individual members of this club in investigating such lands before finally selecting this locality. New settlers may save that time and expense by coming direct to this district, when we are convinced they will think it is

Grain in Shock, Donald District

unnecessary to go to the expense of investigating other parts of the country.

In the letters by our club members, each individual has endeavored so far as possible in the space at his disposal, to give such a plain, exact, detailed statement of the results he has been able to obtain in his farming operations that the reader, from these varied experiences, may gather an intelligent idea of what he should expect to accomplish.

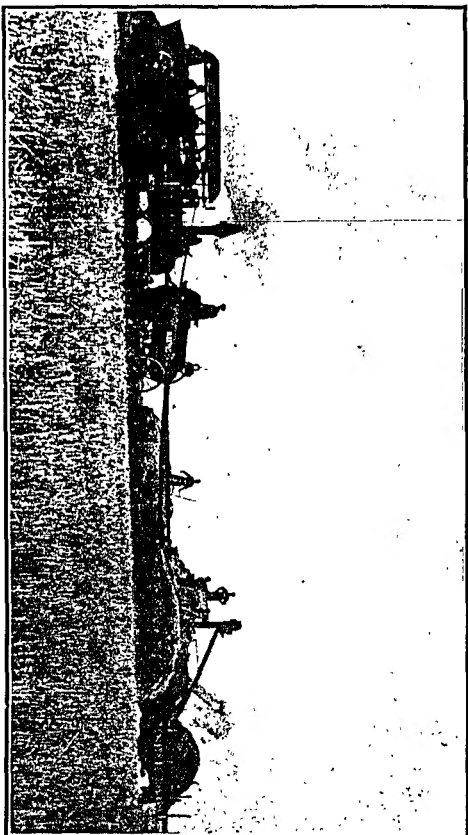

The views shown are photographs taken in the vicinity of and on our farms.

LOCATION.

We are located in that portion of the Province known as Central Alberta. Our town of Donalda is situated on the Calgary-Edmonton line of the Canadian Northern Railway about half way between these two cities, the largest between Winnipeg and the coast and the best of markets for cattle, hogs and dairy products. In order that the position of our district may be located at a glance, it has been plainly marked on the map attached herein.

CLIMATIC CONDITIONS.

We have here what we believe to be ideal climatic conditions for the permanent health and happiness of the individual. The majority of the days are long and bright. The sun is warm, but as there is very little humidity in the atmosphere, it is always pleasant in the shade, and the nights are comfortably cool. Our experience has been, during all the years

Threshing Scene, Donalds District

we have been in the district, that the winters are very agreeable, vastly more so than a great many people, who have never visited Alberta, seem to believe. We have snow, varying from a few inches to a foot in depth, for from two to three months each year, but blizzards are absolutely unknown. While it is true that it sometimes gets cold, these periods as a rule are of very short duration and are likely to be followed by weeks of comfortable pleasant weather. The following figures taken from the government weather reports will show this in a convincing manner.

During the one hundred and fifty-one days in the months of November, and December, 1913, and January, February and March, 1914, there were eighty-one days in which the mid-day temperature at Edmonton varied from thirty to sixty-nine degrees above zero, sixty-one days in which it ran from zero to twenty-nine degrees above, and only nine days in which it ran below zero, the lowest point registered being nineteenth degrees.

The average annual precipitation at Edmonton for the past ten years has been 17.63 inches.

SOIL AND CONTOUR OF LANDS.

The lands vary from almost level to rolling and are locally known as "Park Country". That is there are clumps of willow and poplar brush here and there, varying in extent and

followed by open spaces of prairie ready for the plow, giving the district a park like appearance. It is not difficult to clear this brush, but very important that a reasonable area should be left on each farm owing to its value as fuel, fence posts, building material and an admirable protection for stock during the winter months. The soil is a rich dark loam underlain with a good clay sub-soil, and covered with a very heavy growth of native grass.

CROPS.

The large yields of wheat, oats, barley and flax secured in Alberta are too well known to need emphasis here. However, our experience has been that more money can be made in this district by carrying on mixed farming, that is in dairying, raising cattle, hogs and feed, than by growing grain for the market. We, therefore, in addition to wheat, seed large areas to barley and oats, which produce very abundantly, as do also potatoes, cabbage, all root crops, garden truck of all kinds and small fruits.

Experiments have been conducted to such an extent with alfalfa, timothy and clover, that we feel justified in stating that they can be successfully produced. However, as the district is, as yet, rather sparsely settled and owing to the heavy growth of native grass, heretofore mentioned, it has been unnecessary to go into tame grasses.

CATTLE AND HOGS.

Having these rich pastures and abundance of grain, we are rapidly becoming known as one of the great cattle raising and finishing districts of the province. Dairying is fast becoming an important industry with us, the products of which always command good prices.

We claim a hog can be produced here as cheaply as any other place on the continent. When you understand that hog diseases are practically unknown in Alberta, and take into consideration our excellent markets, you will easily realize the splendid profits we are able to secure from this industry. We have direct railway connections with Calgary and Edmonton, the great markets to the south and north, and also with all markets to the east and west.

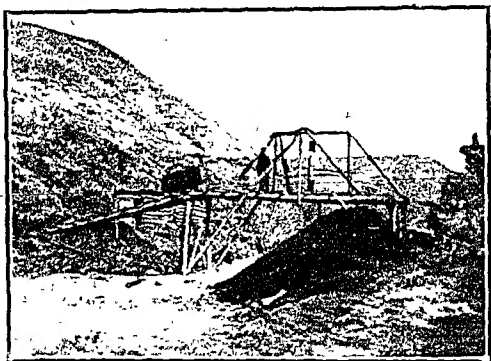

SCHOOLS.

The school system in Alberta is equal to any on the continent. The schools are organized and governed in very much the same manner as those in the United States. Owing to liberal government assistance the cost to the settler of maintaining the school is comparatively small. Each teacher employed must have a certificate of recognized standard of education and a thorough system of government inspection is maintained.

Our school districts have been organized and school houses erected.

CHURCHES.

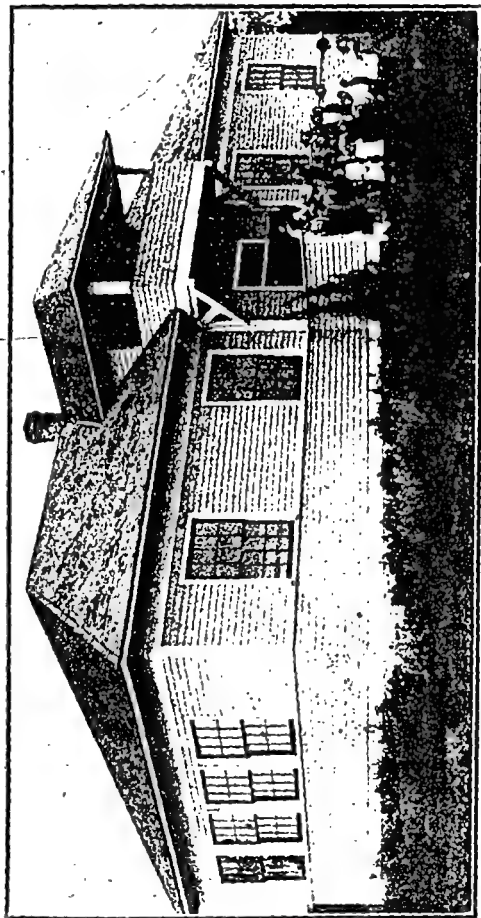

Churches of almost all denominations are found in this district and services are being held regularly.

Coal Mine at Meeting Creek, Near Donalda

FUEL.

The question of fuel is always an important one, and in this we are particularly fortunate. Coal mines have been developed in the Donalda district and a good quality can be purchased at prices varying from \$1.50 per ton at the mine to \$3.00 per ton retail in town. In addition, in some of the patches of brush are found trees of sufficient size to furnish excellent fuel.

School at Donalds

TAXATION.

Farmers who have been accustomed to the system of taxation in agricultural parts of the United States will be interested to know that in Alberta no taxes are charged against the farmers' improvements, live stock, machinery or personal effects. Taxation is simply on the land itself. Every dollar saved on taxes is a dollar added to the profit of the farmer and a comparison of the rates here with those paid in older districts of high priced land, is very much in our favor.

TERMS.

Add to the foregoing advantages the unusual and heretofore unheard of terms upon which the Canadian Pacific Railway is offering lands adjacent to us and you will come to a full understanding of why these lands are being rapidly taken up and our reasons for urging prompt action if you are to avail yourself of this opportunity. One twentieth of the purchase price in cash and the balance in nineteen equal annual instalments with interest at six per cent. per annum.

SETTLERS' LETTERS.

Donalda, Alberta,

February 2nd, 1915

I came from Herried, South Dakota, 13 years ago, and settled down on a homestead near Donalda, and have farmed ever since, in wheat and oats and in cattle, and find this country to be good for mixed farming, and like this better than South Dakota for we can raise better grain and more than South Dakota. For stock we can say we have plenty of hay and good water, and winters are not so hard as South Dakota, and plenty of wood and cheap coal, so it is nice for the farmers who can get it cheap.

GILBERT HANGSTAD.

Notice the Height of These Oats

Donalda, Alberta,

January 15th, 1915

I came here about eight years ago, and am farming in grain and stock. I have found this to be a good country for mixed farming and there is some good C. P. R. land to be got right for a man who wants a good home.

DAVID McKAY.

Donalda, Alberta.

January 7th, 1915

I came to this part of the country in 1903 from South Dakota. I thought I was farming in Dakota, but I find that I was only trying. I was doing the work but not succeeding very well. I am getting along all right here raising a little of everything. The grain yield is very much ahead of Dakota. 30 bushels of wheat to the acre can be produced with good work and an average yield.

DAN BERNARD.

Donalda, Alberta.

January 26th, 1915

I came from Seattle, Wash, nine years ago and ~~settled down on a homestead and am~~ farming. We have a coal mine, the best coal for the money, \$1.75 per ton, and the farmers are using it, and I will say it is as good as any soft coal in the States.

We are farming in wheat and oats, and raise good crops every year and for stock it is a fine country—couldn't be any better.

OSCAR NORMAN.

Red Willow, Alberta.

January 28th, 1915

I came from Iowa Falls, Iowa eight years ago and settled down on a homestead and find this country to be good for mixed farming. Wheat is fine and so is oats and for cattle and sheep it is good shelter for them and plenty of hay and good water and will say we like it well here and I think for anyone who wants to come to this country it is a good place to get cheap land yet and the time is coming when all cheap land will soon be gone. This is a very good country for stock and horses can go out all winter on the range without any feed and keep good and the cattle dont have to be stabled like they have in Iowa.

J. H. KAHL BROS.

Ferry Point, Alberta.

February 2nd, 1915

I came from Scotland 15 years ago. I landed in Lacombe district and homesteaded there. There were not many settlers in that district at that time. I bought a C. P. R. quarter adjoining me for \$3 per acre, and after breaking 125 acres in all on the half section I sold out for \$20 an acre about nine years ago, and since then have been interested in storekeeping. I consider this country is all that can be desired for young men with lots of energy and grit to go ahead and make money.

ANDREW HALL.

Farm Home, Donalda District

Donalda Alberta,

January 15th, 1915

I came from Gleanwood, Wisconsin, U.S.A. 13 years ago, and settled on a farm and like this district for farming, both grain and cattle and find this is as good as I ever found. The weather is not so hard and for mixed farming it is good. We have some good shelter and some open prairie, and it is not hard to get to farming, and we have railroad close and a good town close by.

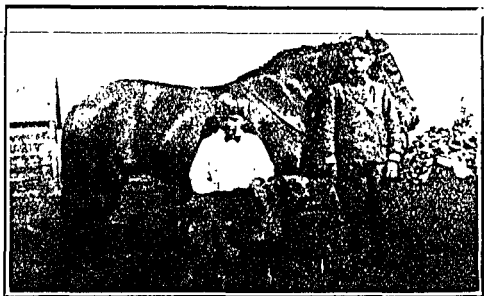

WILLIAM SCHULZE.

Donaldal, Alberta,

January 21st, 1915

We came from Pollock, South Dakota, eleven years ago, and started on the farm and found the country all right for mixed farming. We moved to town and started business for ourselves. We are doing all right and if some of you want to come and make homes in this country it is the best to my thinking of any country. You can raise more wheat, oats and barley here and for cattle it is the best, for the winters are not like South Dakota but much better.

VIKSE BROS.

Young Settlers in Donaldal District

Hastings Coulee, Alberta,

January 6th, 1915

I live on section 32-41-16-W4. I own the N.E. $\frac{1}{4}$ of 32 and N.W. of 33. Engaged in mixed farming and I am sure well satisfied. I came here with my family from Cavalier County, North Dakota.

I live 13 miles straight east of Donaldal in Hastings Coulee District. I bought a quarter at \$20.00 an acre and put 40 acres in wheat and thrashed 1,500 bushels.

J. F. MESSNER.

Ferry Point, Alberta,

February 2nd, 1915

Ten years ago I left Melbourne, State of Victoria, Australia, for Alberta, Canada, with little capital. After looking about for a month or two I decided to throw in my lot with the province, as I considered it was just the place for the man of moderate means to progress and go ahead. My anticipations, I am glad to say have been fully realized. At the start I took a small interest in a store and later on went in for stock and farming land. Anyone can write me to Ferry Point, Alberta, and I'll think it no trouble at all to answer and give them all the information I can concerning this paradise of the West.

F. R. BAIRD.

Children Enjoy Alberta Winters

Donalda, Alberta.

January 15th, 1915

I have lived here nine years, farming in wheat, oats and barley and also raising cattle, and like the country for mixed farming. The weather is fine, for stock stand the cold better than Kansas twice over, for cattle can rustle more than down there, and have some good shelter to go in so the cold weather don't affect them so much. Coal is close by and good.

WINFIELD LOGAN.

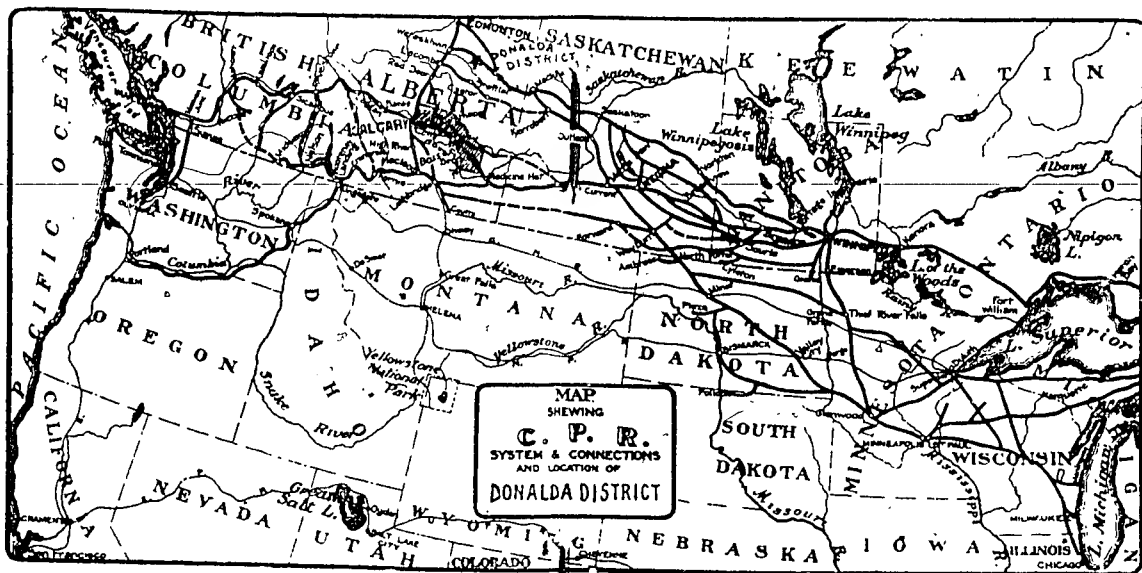

Donalda, Alberta,

January 15th, 1915

I came from Ledgerwood, North Dakota, eight years ago and settled on a homestead close to Donalda, and am farming in wheat and oats and found this to be better than around Ledgerwood, for we can raise more

North Dakota for there are plenty of small groves for them to go in and for hogs it is fine also.

If a man wants to come and make a home, it is the best, I think, for I go around and thresh and break with my steam rig, so I find out the country around here. THOS. LONEY.

wheat to the acre, from 20 bushels to 40 bushels to the acre, oats 40 to 100 bushels per acre—and only one year that I did see a little frost in low places, but not to speak about.

I am farming about 400 acres in wheat and oats and have a good many horses and cattle and the horses and cattle are fed outside in the winter which is not so bad as it is in

Meeting Creek, Alberta,

January 6th, 1915

I own the S.E. 4 of Sec. 20-42-19 west of the 4th. I came here with nothing from Sweden, about 12 years ago. I am now pretty well fixed. I raise hogs and cattle and grain. There is considerable good C. P. R. land here as yet for sale.

CARL MALINE.

Donalda, Alberta.

February 6th, 1915

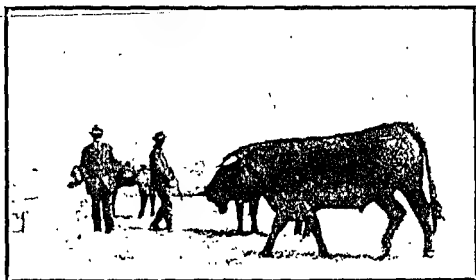

Came to Donalda district 10 years ago from Iowa, homesteaded—bought a C. P. R. quarter section.

Now have a half section, farming 200 acres, also raising hogs, cattle and horses. Milk ten cows, selling cream to Edmonton City Dairy, Donalda Branch.

1914, raised 5,400 bushels of grain.

Located six miles west of Donalda School one mile. Improved farms are worth \$25 per acre. Any inquiries as to prospects here will be cheerfully answered.

(Sgd.) GEORGE ULYETT.

Donalda District is Famous for its Fat Steers

Donalda, Alberta.

January 28th, 1915

I came from Pollock, South Dakota, 12 years ago and settled down on a homestead near Donalda and have been farming ever since. I find this country to be well adapted for mixed farming and all those who have been here the same time as I have done well.

Those who want land in this country can't make a mistake for the land is all right.

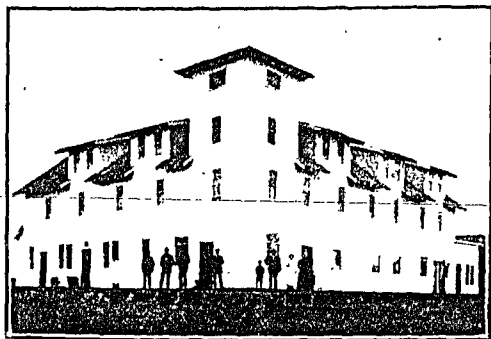

J. R. STOLEE.

Meeting Creek, Alberta,

January 6th, 1915

I was raised on a farm in Western Oregon. I have been here 12 years. Getting along all right I have no kick coming on coming here. I am stock farming here.

T. H. GREEN.

Hotel at Donalda

Wanda, Alberta,

January 15th, 1915

I came from Acton, Ontario, and moved in to the States (South Dakota), and then I moved to this country 21 years ago and have farmed here ever since. I started in this country with one team of horses and fifty dollars and today I have five quarters of land, 225 head of cattle and 150 head of horses and all implements on the farm.

I have seen lots of country but this is fine and there is some land left cheap for farming and we can raise wheat as good as any place for my wheat went 38 bushels to the acre this year, No 1, and I have lots of oats for seed yet to sell. My brother threshed 36,000 bushels of wheat and oats this year.

G. T. CAMPBELL.

Donalda, Alberta.

January 28th, 1915

I came from Pollock, South Dakota, 12 years ago and settled down on a homestead in Spruce Coulee, near Donalda. Arrived with a little and have now 40 head of cattle and 15 head of horses and have all farm implements, farming both stock and grain. My wheat went from 20 bushels up to 50 bushels per acre and my oats from 32 to 90 bushels per acre. I came to South Dakota 37 years ago and stayed there for a long time and the land was not very high at the time, but it went up. This land is better here, for the soil is better and we can raise more to the acre than in South or North Dakota,—for—I—have—made—more—in—12—years than all the time there. The winter is not so hard and there is lots of rain in summer time for the crop and water is the very best; and as for stock we have some nice groves around the building.

LARS S. GARANSRUD.

Donalda, Alberta.

January 21st, 1915

I came from Washington to Alberta four years ago and I find Alberta to be an ideal country for mixed farming and stock raising. Also there is no better soil to be found than there is in Alberta. Wheat averages from 25 to 45 bushels to the acre, oats usually from 40 to 80 bushels per acre. I raised 1,260 bushels of barley on 25 acres of old ground last year. Vegetables, especially potatoes, do exceedingly well around here.

The climate here is fine, the winters are not as cold as in the northern part of the States.

This is the greatest place in the world for a poor man to get a start, as land is cheap and can be bought on twenty years time at six per cent. interest.

Anyone wishing any information regarding the Donalda District will receive prompt replies by writing to

I. N. HAVILAND.

Donalda, Alberta.

January 25th, 1915

I have been in this part of the country 12 years. Come from Rock County, Minnesota. When I first came here the prairies were perfectly wild, but now there are some good farms scattered around. I am mixed farming. I am raising hogs very satisfactorily. Now the grain is so high that it even pays to sell it instead of feeding it. I am on S.E. 20-42-18-W4. My P.O. is Donalda.

O. STANWICK.

Stacking Wild Hay

Donalda, Alberta.

January 6th, 1915

I came from Mobridge, South Dakota to Donalda 13 years ago. I like it well. This country is a gently rolling prairie, well grassed and with numbers of creeks, springs and small lakes scattered about. The land, while it is prairie, has clumps of small timber, which give an appearance of a country that has been timbered somewhat artificially. I have prospered satisfactorily. There are a number of good C. P. R. quarter-sections still for sale that would make good farms.

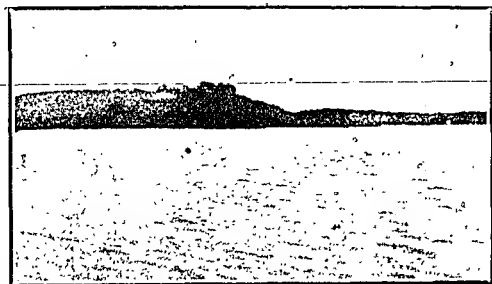

NELS ECKLAND.

Donalda, Alberta.

January 15th, 1915

I come from Pollock, South Dakota, U.S.A. this summer and find everything fine for mixed farming, and find this the best of country.

HALVOR T. HALVORSON.

Lake Near Donalda

Edberg, Alberta.

January 6th, 1915

I came from Minnesota (Polk County), and landed in Wetaskiwin, Alta., in 1894. There was practically little or no improvement on the prairies at that time but the country is changing very fast and settling all over.

The resources almost uniformly are farming and stock raising.

There is an enormous coal deposit scattered over the country, as the outcroppings and developed mines will show. This is a good country to come to and grow up with. I am a general merchant at Edberg, Alta. and can say that the country's ability to buy and pay for what they need is improving vastly.

O. T. NELSON.

Donalda, Alberta.

January 30th, 1915

I came from Mound City, South Dakota, 13 years ago and came to this part of Alberta. This is the best country I ever saw or farmed in. I have no idea of going away. I own a half section and I don't owe a cent to any man. Can recommend this country to any man as a Number One good mixed farming country or a good grain country if you want to grow grain as a chief business.

J. A. BLOMGREN.

Family Group, Donalda District

Donalda, Alberta.

January 28th, 1915

I came from Herning, Denmark, to Eau Claire, Wisconsin, and from there to Staple, Minn., and moved from there to Ferry Point, Alta., and settled down on a homestead, and have been here ever since. I found for farming this is all right. We can raise good wheat and oats, and for stock it is fine.

I have also a business in Donalda and am well satisfied with the country.

CHRISTIAN H. JENSON.

Donalda, Alberta.

January 15th, 1915

I have lived here 10 years and like this country O. K. for mixed farming. There is some timber to use for farming, and it makes a nice grove for stock. There is also lots of coal around the country, for farmers to get cheap, \$1.75 per ton, and the land is O. K. around here, and C. P. K. has got some good land left yet at reasonable prices for farmers who want to come.

KNUTE N. HAUGEJORDEN.

Fishing Party, Donalda District

Donalda, Alberta.

January 6th, 1915

I came from Sweden and have been in Wisconsin two years. I like this country better than Wisconsin. I am farming and stock raising which pays good. There are good chances here for some new people to get farms as there is some good C. P. R. land still for sale. I am a little over six miles from a coal mine, and there are some clumps of small timber scattered over the prairie so it is not entirely without wood. And there are a number of small lakes scattered around making good water for stock.

VICTOR JOHNSON.

Donalda, Alberta,

February 3rd, 1915

I came into this district in 1903, when there were a few isolated ranchers as the only settlers in the part south west of where Donalda now stands. Our nearest railway station was Lacombe, 60 miles away, and our post office was Lamerton, 25 miles.

I homesteaded near where I first located, about four miles from Buffalo Lake and have remained there ever since, and have made a business of mixed farming and stock raising. Have aimed to feed most of grain and hay produced, and can say truthfully that I believe there is no better mixed farming and dairying and stock growing country to be found than there is in the Donalda district.

Since I first homesteaded I have purchased three adjoining quarters, and feel that there is no safer investment to be made. We have had no crop failures during any of the years since I have located here.

Have had good success in raising timothy and alfalfa, and at present time have alfalfa that has been through two winters. In 1913 we cut two crops of timothy from one of our timothy fields.

At the present time we have about 22 head of horses, about 15 head of cattle and about 85 hogs.

Grain does well here, oats go from 45 to 90 bushels per acre, barley from 25 to 50 bushels, and wheat from 20 to 45.

In 1914 I thrashed five acres timothy, which yielded 50 bushels.

Yours truly,

W. E. LEE

Donalda, Alberta,

January 15th, 1915

We came from Detroit, Minn., U.S.A. eight years ago and settled down on a homestead. We like it fine and will say it gives a better chance than down there where we came from. There are not such blizzards as down there, and all kinds of hay for stock and plenty of shelter and range for stock, and crops are just as good as down there. We wouldn't go back there to farm.

RAMSTAD BROS.

Prairie Chicken Afford Good Sport, Donalda District

Donalda, Alberta,

January 29th, 1915

I came from Burston, Kansas nine years ago and settled down on a homestead. After proving up my homestead I went to California. Was there three years and I saw this was the country, so I came back here again for I can say I have seen lots of country in the States but this is the best for a man to get a start.

H. P. ROBINSON.

Donalda, Alberta,

January 15th, 1915

I came from Sioux City, Iowa, three years ago and settled down here on 160 acres and find it to be a good country for we can raise all kinds of wheat and oats. Wheat went as high as 40 bushels per acre and oats 60 bushels per acre, and for stock it is fine; for winter is not so bad as it is in Iowa.

GEORGE LUNDE.

Stacking Timothy, Donalda District

Donalda, Alberta,

January 15th, 1915

I came from Foulton, South Dakota 12 years ago and settled down on a homestead and have lived here since and like this country fine, better than South Dakota, for here are some good groves for stock to go in, so it makes the best country for mixed farming, and plenty of coal cheap and also lots of hay for stock. We can raise good wheat and oats, the best I have seen.

LARS E. HAGEN.

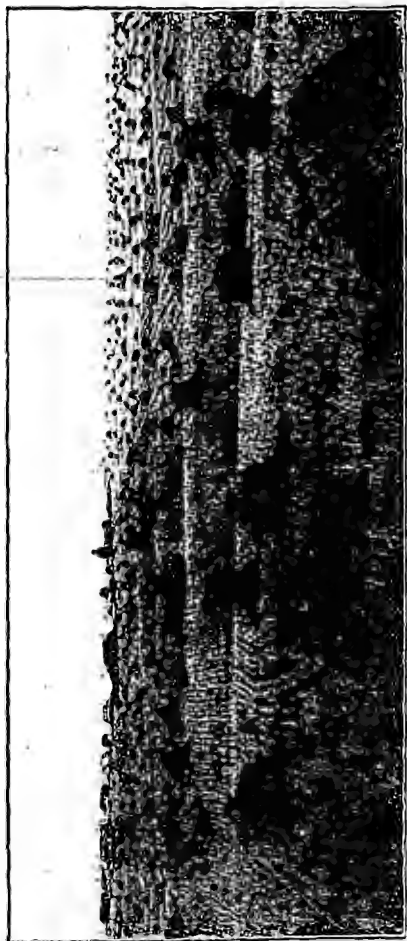

Donalda, Alberta.

January 20th, 1915

I have lived and done business in the western states, first in Viroque, Wis., next I went to New Hampton, Iowa, and I found land most too high priced, so I moved to Viblen, Marshal County, South Dakota, and found that to be a good country at the time. Land was selling then at \$10 and \$12 per acre, but that land has advanced to around \$75 per acre. I realized on the better price of the land and came to Alberta and finally to this part, which I like very much. I have wheat here this season yielding as high as 42 bushels to the acre and oats as high as 75 bushels to the acre. For stock and mixed farming it is as good as I ever saw. There is plenty of wild hay on the unsold and unoccupied lands. The country runs from a level to a gentle rolling prairie, with a solid all-over sod of good long grass.

There are numbers of small scattered natural groves of poplar and cotton-wood. The soil is a black loam with a clay subsoil. This country is building up well with good farmers from the States. Land is reasonable in price so far. It is safe to say with the prices of produce it will all be under cultivation and double in price inside of five years.
